Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

Says
What have we made them say?
What else we inspire more saying?

Thinks
What are its main needs, hopes and wants? What else identifying captured or at which want?
